SUMMARY

Experienced ERP Developer with expertise in designing, building, and maintaining ERP systems, adept in diverse web technologies, proficient in SQL and Java. Proven record in translating technical details into strategic solutions, committed to delivering top-tier ERP solutions through transparent communication and cross-functional teamwork.

CAREER OBJECTIVE

Committed to advancing organizational goals through ongoing learning and contribution, nurturing organizational growth, and continually developing, refining, and sharing my skill set.

SKILLS

Java	Skilled Java developer with two year of experience, proficient in object-oriented programming, Java SE libraries, and collaborating within cross-functional teams to deliver effective solutions
MySQL	Experienced with MySQL database management in a professional setting for two year, adept at designing schemas, writing complex queries, and optimizing database performance.
Primefaces (jsf)	One year of hands-on experience in developing dynamic user interfaces using PrimeFaces framework, proficient in creating interactive web applications with rich components and seamless integration
Html	Proficient in HTML, skilled in structured web content, versed in HTML5, with multimedia integration and form creation abilities, poised for success in intermediate-level dynamic web development..
Css	Proficient in CSS for web styling with experience in creating responsive designs. Skilled in optimizing user interfaces for improved user experience as an intermediate-level developer.
Javascript	Proficient in JavaScript, adept at crafting interactive web apps and DOM manipulation, eager to master modern JavaScript frameworks.
Spring boot	Intermediate-level expertise in Spring Boot, with a track record of developing robust and scalable web applications. Proficient in leveraging Spring Boot's features for efficient backend development

EXPERIENCE

From: Apr-2022   **Intern Program Analyst (Java)**

Effittac Solution

- Compiled and provided data for developer testing procedures, processes, and requirements.
- Designed code for applications in alignment with use cases and functional requirements.
- Documented testing methodologies, results, and system corrections.
- Demonstrated versatility in team-based projects, taking on multiple roles.
- Programmed applications and tools using object-oriented languages, emphasizing code abstraction, stability, and reuse.
- Enhanced and rectified existing software and system applications.

Jun-2023 - Till Today   **Program Analyst (Java)**

Effittac Solution

- Identified opportunities for process improvements to reduce support calls.
- Collaborated with the support team to aid client stakeholders in resolving urgent technical issues and crafting effective solutions.
- Analyzed user requirements and software specifications to assess design feasibility.
- Assessed project requirements to define customer expectations and resource requirements for goal achievement.
- Enhanced performance and introduced new features by modifying existing software systems.

PROJECTS

Project Name: Enterprise Resource Planning (ERP)

Role: Developer   **Team Size:** 5   **Project Duration:** 1 Year

Successfully completed ERP implementation and development projects for a variety of clients.Developed custom integrations between the ERP system and other third party applications.Developed custom reports and dashboards to meet business requirements.Provided support and maintenance of existing ERP systems.Created data migration scripts to transfer data from legacy systems to new systems.Developed workflows, forms, and scripts to automate business processes.Tested and debugged ERP systems to ensure their functionality and accuracy.Provided training and user support for ERP systems

Project Name: Garments Weaving Management (ERP)

Role: Developer   **Team Size:** 4   **Project Duration:** 1 Year

Led the development of a comprehensive Java-based ERP solution tailored specifically for the garments weaving industry. The ERP software facilitated seamless management of all aspects of the weaving process, from raw material procurement to finished product distribution. Leveraged Java EE technologies to deliver a scalable, customizable, and feature-rich solution that optimized operational efficiency and enhanced decision-making capabilities.
